Skin Packing

For your retail/showroom needs, FERSCO can skin pack bandsaws & other items for an additional fee of \$1.75 each. Call us for details.

CUTTING TOOL SAFETY DATA

Cutting Tools can shatter and/or break under severe or improper use. Wear Safety equipment, and particularly eye protection, at all times in the vicinity of their use.

Terms and Conditions of Sale

This price list supersedes all previous lists. It is subject to change without notice. All orders are subject to acceptance by Floyd Ready Associates.

No Minimum Order

- Warranty: Floyd Ready Associates warrants our products only against defects in workmanship and/or materials under normal service, proper installation and use and is limited to the repair and/or replacement of verified defective products. No other warranties, implied or otherwise, are extended.
Claims: Shortages or errors in shipment, or UPS guaranteed shipments that are late, must be reported within 3 days after receipt of merchandise. Damaged shipments should be reported to the delivery agent, then reported to Floyd Ready Associates. If you receive an invoice you believe in error, call the A/R Department promptly.
Returned Goods: All returned goods must be pre-approved by Floyd

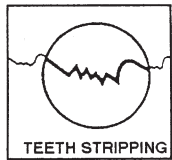

Ready Associates and issued a R.G.A. number. The R.G.A. number must be written on the packaging and the packing slip, including an explanation for returning. Return charges must be prepaid. If credit is authorized, it will be issued on current items at price paid, less 15% restocking charge. Reasonable packaging and reconditioning charges may be added, if necessary.

- Terms of Payment: Net 30 days. 2% discount off of merchandise if paid within 10 days. Due date, discount date, and discount amount are stated on invoicing. Accounts over 30 days may be subject to a service charge of 1-1/2% per month and accounts over 45 days may be placed on shipment hold. \$25.00 fee for NSF checks. We accept MasterCard, VISA and Discover.
Freight Allowances: For shipments within the 48 continental states totaling \$600.00 net or more, except for air freight charges. Coolant & Cutting Oils are F.O.B. Jackson, MS.

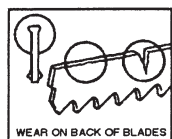

Bandsaw Blade Terminology, Information, and Problem Solving

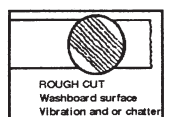

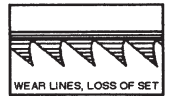

1. **Width** Tip of the tooth to the back of the blade
2. **Gage** The thickness of the blade
3. **Tooth** The cutting portion of the blade
4. **Gullet** The curved area of the base of the tooth
5. **Tooth Face** The cutting surface of the tooth
6. **Tooth Set** The bending of the teeth from right to left to allow clearance of the blade back through the cut
7. **Blade Back** The blade body not including the tooth area
8. **T.P.I.** The number of Teeth Per Inch
9. **Tooth Pitch** The distance from one tooth tip to the next tooth tip
10. **Gullet Depth** The distance from the tooth tip to the back of the gullet
11. **Tooth Back** The surface of the tooth opposite the cutting edge

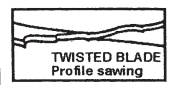

PROBLEM	PROBABLE CAUSE	SOLUTION
 TEETH STRIPPING	<ul style="list-style-type: none"> • Feed pressure too high • Tooth stuck in cut • No cutting fluid or incorrect coolant • Hard spots scale, inclusions, etc. • Incorrect blade • Work spinning in vice • Incorrect break-in • Blade teeth running backwards • Chip brushes defective 	<ul style="list-style-type: none"> • Reduce feed pressure See cutting/ speed charts • Never enter same cut with new blade • Check coolant table • Check hardness, descale and anneal if necessary • Check cutting chart • Check hydraulic pressure • Use recommended break-in • Reverse blade (turn inside out) • Check chip brushes
	<ul style="list-style-type: none"> • Material loose in vice • Incorrect blade (wrong pitch) 	<ul style="list-style-type: none"> • Check hydraulic pressure • Check cutting chart

 BROKEN TEETH Front of tooth indicates work spinning in vice.	<ul style="list-style-type: none"> • Insufficient blade tension • Incorrect feed (excessive) • Back-up guide frozen in position 	<ul style="list-style-type: none"> • See manual for tension • Reduce feed pressure • Free pressure block and realign, if worn replace
---	--	--

 WEAR ON BACK OF BLADES	<ul style="list-style-type: none"> • Guide arms too far apart, worn or loose • Blade rubbing on wheel flanges 	<ul style="list-style-type: none"> • Move arms as close to work as possible • Adjust wheel alignment
--	---	--

 ROUGH CUT Washboard surface Vibration and/or chatter	<ul style="list-style-type: none"> • Dull or damaged blade • Incorrect feed/ speed • Lack of band support • Insufficient band tension • Incorrect pitch blade 	<ul style="list-style-type: none"> • Replace with new blade • Check cutting chart • Set guide arm as close to work as possible • Check operator's manual for correct tension • Check cutting chart
--	--	---

 WEAR LINES, LOSS OF SET	<ul style="list-style-type: none"> • Saw guide inserts or pulley riding on teeth • Insufficient blade tension • Hard spots • Backing guide worn 	<ul style="list-style-type: none"> • Check operator's manual for correct blade width • Check for correct tension • Check material hardness • Replace
---	---	--

 TWISTED BLADE Profile sawing	<ul style="list-style-type: none"> • Band sticking in cut • Side guides too tight • Work not held firmly • Incorrect or lack of cutting fluid 	<ul style="list-style-type: none"> • Check for over-feed, damaged set, blade width for radius being cut • Set side guides properly • Check vice & hydraulics • Check coolant table
---	---	--

Bandsaw Blade Tooth Type

Regular 	A conventional tooth with 0° cutting angle for all general purpose applications.
Variable 	Combines varying gullet depth and rake angles for maximum cutting speeds. Designed to reduce vibration associated with cutting structurals and gang cutting of solids. Best tooth design when sawing tough-to-cut metals.
Hook 	A 10° positive rake angle for fast cutting of gummy materials. The rounded, deeper gullets allow fast chip removal. Generally used when cutting large cross-sections of material.
Skip 	Designed with longer, shallower gullets for extended chip removal. Recommended for plastics, wood, and other soft materials. (Carbon blades only.)

Bandsaw Blade Tooth Set

Variable 	All variable tooth blades also have a variable, modified raker set.
Regular Raker 	Best-suited where materials being cut are of uniform size and for contour cutting.
Wavy 	For cutting very thin materials where tooth breakage has been a problem. Cuts a variety of shapes and thicknesses.

Bandsaw Tooth Form

Positive Rake 	Available in all coarser tooth, bi-metal blades. A 5° to 10° cutting face for better tooth penetration and easier chip formation. Recommended for cutting tough, hardened materials.
Standard Straight 	A 0° cutting face for cutting low alloy easier-to-cut materials as well as irregular shapes.

Carbide Grit Edge

Carbide Grit super bonded to a quality steel back. This is a blade for tough alloys, abrasive materials, and most composites. Use Carbide Grit Edge where traditional toothed blades do not work or if they wear too quickly to be cost efficient.

Bi-Metal M-42

M-42 high speed steel cutting edge welded to a high quality steel back. This is a production cutting blade ideal for harder, more difficult to cut materials with grater ability to withstand abrasion and best on solids.

WELD FEES INCLUDED IN PRICING ABOVE: \$5.58 (1/4" - 1-1/4") OR \$8.15 (1-1/2" - 2")

Bi-Metal Matrix

Matrix high speed steel cutting edge welded to a high quality steel back. This is an all around high performance metal cutting blade ideal for structural products, pipe, and any interrupted cut.

WELD FEES INCLUDED IN PRICING ABOVE: \$4.62

Foam/Cardboard/Plastic Package

Ideal for micro foam, poly foam rolled on cardboard, corrugated cardboard, plastic, and styrofoam.

Single Edge

Width	1/2"	5/8"	3/4"	1"
Thickness	.020	.020	.020	.020
Tooth	10	10	10	10
Cost per foot	\$1.67	\$1.76	\$1.81	\$1.99

Double Edge

Width	1/2"	5/8"	3/4"	1"
Thickness	.020	.020	.020	.020
Tooth	10	10	10	10
Cost per foot	\$2.17	\$2.25	\$2.33	\$2.50

Scallop

Ideal for flexible foam, rubber, sponge, corrugated cardboard, and plastic. Available either single bevel or double bevel.

2 Tooth

Width	1/2"	3/4"	1"
Thickness	.020	.020	.020
Cost per foot	\$1.55	\$1.70	\$1.81

4 Tooth

Width	1/2"	5/8"	3/4"	1"
Thickness	.020	.020	.020	.020
Cost per foot	\$1.22	\$1.62	\$1.28	\$1.47

V-Tooth

Ideal for flexible foam, sponge, and light weight rubber. Available either single bevel or double bevel.

Single Edge

Width	1/8"	1/4" - 1/2"	5/8" - 3/4"	1"	1-1/4"	1-1/2"	1-1/2"	2"	2"
Thickness	.0235	.020	.020	.020	.020	.020	.032	.025	.032
Tooth	20	10, 12, 14	10, 12, 14	10, 12, 14	10, 12, 14	10, 12, 14	10, 12, 14	10, 12, 14	10, 12, 14
Cost per foot	\$1.99	\$0.87	\$0.94	\$1.13	\$1.67	\$1.99	\$2.17	\$3.92	\$5.79

Double Edge

Width	1/4" - 1/2"	5/8"	3/4"	1"
Thickness	.020	.020	.020	.020
Tooth	10, 12, 14	10, 12, 14	10, 12, 14	10, 12, 14
Cost per foot	\$1.19	\$1.24	\$1.39	\$1.45

Knife

Ideal for prime foam, rebonded foam, sponge, rubber, and leather. Available either single bevel or double bevel.

Single Edge

Width	1/8"	3/16"	1/4" - 1/2"	5/8" - 3/4"	1"	1-1/4"	1-1/2"	1-1/2"	2"	2"	3"	3-3/8"
Thickness	.020	.032	.020	.020	.020	.020	.020	.032	.025	.032	.035	.040
Cost per foot	\$2.23	\$1.67	\$0.87	\$0.94	1.13	\$1.67	\$1.99	\$2.17	\$3.92	\$5.79	\$6.64	\$7.46

Double Edge

Width	1/4" - 1/2"	5/8"	3/4"	1"
Thickness	.020	.020	.020	.020
Cost per foot	\$1.19	\$1.24	\$1.39	\$1.45

Available in both 250 ft. Coils and Welded to Length blades.

TO FIGURE COST:

FOR a 250' coil multiply 250 x cost per foot

FOR welded blades multiply length of blade rounded up to the next half foot or the next full foot x cost per foot, then add \$4.62 weld fee

Portable Bandsaw Blades

Bi-metal M-42

Variable tooth. Super heavy duty M-42 high speed steel cutting edge ideal for difficult to cut materials where quality and high performance is a priority.

Part #	Size	Quantity	Tooth Size	Cost Ea.
FPM32XXV	32-7/8" X 1/2" .020	5 PER BOX	10/14, 14/18, 20/24	\$12.84
FPM35XXV	35-3/8" X 1/2" .020	5 PER BOX	10/14, 14/18, 20/24	\$12.84
FPM44XXV	44-7/8" X 1/2" .020	5 PER BOX	10/14, 14/18, 20/24	\$8.39

Bi-Metal Matrix

Matrix high speed cutting edge ideal as an all around metal cutting blade.

Part #	Size	Quantity	Tooth Size	Cost Ea.
FPB32XX	32-7/8" X 1/2" .020	5 PER BOX	10, 14, 18, 24	\$10.81

FPB44XX	44-7/8" X 1/2" .020	5 PER BOX	10, 14, 18, 24	\$8.19
FPB53XX	53-3/4" X 1/2" .020	5 PER BOX	10, 14, 18, 24	\$11.31

Hacksaw Blades

Hand

Bi-metal

High speed steel edge: tough, durable die steel back
Premium Quality

Part #	Size	Tooth Size	Cost Ea.
FHHB120.50XX	12" X 1/2" .025	14, 18, 24, 32	\$1.42

To Complete Part Number: Insert T.P.I at XX
AVAILABLE IN 10/PACK OR 100/BOX

Reciprocating and Jigsaw Blades

Matrix high speed steel high cobalt cutting edge.
Ideal for most all cutting requirements from wood and metal
to sepcial purposes.

Bi-Metal Reciprocating Saw

Carbide Grit Holesaw

Tungsten carbide grains bonded to a quality alloy saw with a gulletted edge. 1-15/16" cutting depth. Ideal for materials that are extra hard or abrasive, such as ceramics, hard woods, and composites.

Machine Fluids

Heavy Duty Coolants

Dilutable, heavy duty, high quality, concentrate.

READY COOL

An all purpose, biodegradable, 100% synthetic fluid uniquely blended with chemical compounds that combine to produce an exceptional water soluble grinding fluid.

READY SOL

A multi-purpose heavy duty semi-synthetic cutting fluid formulated for shops that expect to handle a variety of metal-working operations with a single cutting/sawing fluid.

Cutting & Threading Oil

Heavy duty, high quality oil.

READY CUT OIL

A quality blend of active sulphur cutting compounds for use in general machining, light broaching, easy threading, and reaming of ferrous metals.
